

PROFILE

Assistant Content Marketing Manager who runs and builds the systems behind the content and educational hub. At Vantage, a global CFD broker, I grew organic clicks 3.6× in 14 months on the English properties I own directly — while the wider library reached 179K clicks and 44M impressions in H1 2026, matching all of 2024 in half the time. I built the production systems behind it (an AI content platform with factual verification and compliance rules baked in; a BigQuery search-performance pipeline) and led the copywriting function serving teams across the business. Former mechanical design engineer — I treat content operations as a production system: measured, automated, and compliant by design.

EXPERIENCE

Assistant Content Marketing Manager | Vantage, Kuala Lumpur | March 2024 – Present

- **Organic growth ownership** — Owned and executed the organic content strategy across Vantage’s English-language educational and commercial properties, including Academy and Terminology, growing monthly organic clicks by **3.6× from 4.1K to 14.9K** and impressions by **4.6× to 2.4M within 14 months**.
- **Multilingual content performance** — Directed the optimisation of Vantage’s multilingual content library, increasing annual impressions from **17M in 2024 to 38M in 2025, a 118% increase**, while improving average Google position from approximately 38 to 13; by H1 2026, the library had generated **179K clicks and 44M impressions** at an average position of approximately 10, nearly matching the full-year 2024 click total in half the time.
- **Page-One Search Visibility** — Strengthened English-language search visibility through content clustering, on-page optimisation, and continuous content improvements, securing page-one Google rankings for **4,000+ queries**, including **1,200+ top-three positions**, with **94% of organic clicks** generated by page-one rankings.
- **AI content production system** — Designed and built a Claude-powered content production system to scale content output while maintaining quality, using version-controlled workflows for drafting, factual verification, market-specific compliance, and search-data-driven optimisation; monthly organic clicks across the English properties increased from **7.5K to 14.9K within five months of rollout**.
- **Commercial-intent content program** — Built and scaled a bottom-of-funnel content programme targeting high-intent queries such as broker comparisons and market-access guides, increasing monthly organic clicks by **7.3× to 9K within 14 months**; the programme now generates approximately **60% of English content-driven organic traffic**.
- **Editorial pivot around market themes** — Identified increased search demand around gold during the 2024 rally and redirected the editorial calendar towards an underserved topic cluster, growing gold-related content to **23% of overall clicks** and producing the Academy section’s **two highest-traffic pages**.
- **Continuous optimisation program** — Use Semrush organic research, competitor keyword-gap analysis, and Google Search Console query data to find pages losing ground or stuck outside striking distance, refresh content and metadata, and track click recovery — supported by a data-driven internal link library built from Search Console page data.
- **Copywriting team leadership** — Lead the copywriting function as project manager and adviser: coordinate a team of copywriters handling cross-team requests — landing pages, emails, ad copy, podcast and video scripts, ebooks — setting direction, reviewing final quality, and advising on improvements.
- **AI localisation system (in testing)** — Designing and validating an AI-driven local-language content system across 6 APAC languages (Vietnamese, Indonesian, Malay, Simplified & Traditional Chinese, Japanese) with market-specific keyword integration — currently testing output quality and workflow fit ahead of scale-up.
- **Content syndication** — Initiated and onboarded a syndication partnership with a financial publisher network, extending distribution beyond owned channels.

Senior Content Marketer | Vantage, Kuala Lumpur | July 2023 – March 2024

- Owned the content calendar across concurrent campaigns, coordinating SEO, design, and product stakeholders to ship on schedule.
- Took on first people responsibility: began reviewing junior writers' work on cross-team copy requests — landing pages, emails, ad copy, campaign assets — checking accuracy and brand voice and guiding direction.

- Audited underperforming pages using Search Console and Semrush data and refreshed them for rankings and conversion — early groundwork for what became the Academy's systematic optimisation program.
- Identified content coverage gaps and proposed editorial priority shifts adopted by the team — contributing directly to promotion to Assistant Content Marketing Manager within nine months.

Content Writer | Vantage, Kuala Lumpur | August 2022 – July 2023

- Wrote long-form SEO articles, ad copy, infographics, and social assets on CFD and trading topics — structured for search from the draft stage, several of which still rank and drive traffic today.
- Applied on-page SEO practices across the blog, contributing to the content foundation Vantage's operation has since scaled on.

Mechanical Design Engineer | Genetec Technology Automation, Malaysia | December 2017 – February 2022

- Designed assembly and production-line systems for client manufacturing operations, contributing to projects that improved client output by 20%.
- The systems-design discipline from this role — decomposing processes, testing alternatives, documenting rigorously — now underpins the content automation systems I build.

SELECTED PROJECTS & SYSTEMS

Vantage Academy — SEO Content Platform *Content strategy · AI production systems · SEO*

Own end-to-end content operations for Vantage's flagship trading-education library, serving retail traders across global markets. Designed and built a Claude-powered content production system for English-language properties, using version-controlled workflows for drafting, factual verification, market-specific compliance, and search-data-driven optimisation. Monthly organic clicks across these properties increased from **7.5K to 14.9K within five months of rollout**.

Lead the editorial strategy across evergreen thematic clusters, commercial-intent topics, and news-responsive content, contributing to page-one rankings for 4,000+ queries and the brand's highest-traffic content clusters. Separately, designing and validating AI localisation pilots across six APAC languages; these remain in testing and are excluded from the stated performance results.

Content Optimisation Dashboard *BigQuery · SQL · Python · Google Search Console · Semrush*

Built an automated content performance pipeline on BigQuery ingesting Google Search Console data (800K+ rows per extraction) across daily, weekly, and monthly aggregations, enriched with Semrush keyword data (volume, difficulty, intent). Powers weekly performance reports and a prioritised worklist that classifies every page as refresh, quick win, or prune — replacing manual analysis with demand- and winnability-driven optimisation decisions and cutting weekly reporting from hours of manual work to an automated run.

SKILLS

- **SEO Strategy & Research** — Keyword research, competitor keyword-gap analysis, SERP analysis, search-intent mapping, topic clustering & pillar-cluster architecture, striking-distance keyword targeting, trend-driven content planning, cannibalisation detection.
- **On-Page & Technical SEO** — On-page optimisation, metadata optimisation & A/B testing, featured-snippet optimisation, internal-linking strategy, content audits & refreshes, canonicalisation, 301 redirect strategy, sitemap management, cross-domain & international SEO.
- **AI & Data Systems** — Claude (skills, projects & API workflows), prompt & system design, AI-assisted drafting and imagery, AI search optimisation (AI Overviews & generative engine visibility — active experimentation), Python, SQL, Google BigQuery, regex-based Search Console analysis, automated reporting pipelines.
- **Tools & Platforms** — Semrush, Google Search Console, GA4, Google Trends, WordPress, Excel / Google Sheets dashboards.
- **Domain & Cross-Functional** — Financial markets content (CFD/forex, investing education), compliance-aware content workflows, multilingual content operations, stakeholder management, content syndication partnerships.

EDUCATION

MEng (Hons) Mechanical Engineering, Second Class Upper — University of Nottingham Malaysia Campus | 2017
